Data Analyst Manager Front-End Developer

from Ukraine based in Antwerp, Belgium

Liudmyla Leroy

I like children and numbers.

As a mathematician, I see the beauty of this world.

As a physicist, I see the foundations of existence.

As a teacher, I understand the power of knowledge and development.

As a programmer, I create, fill, develop, get to know this world even more.

As an economist and analyst, I analyze everything, make it easy to understand and help make important conclusions and plans.

As a person, I strive to improve this world.

What am I looking for?

I am looking for a team of like-minded people with whom I will be comfortable working and doing good and useful things.

Now I would prefer data analytics, business intelligence or programming. And also the remote format of work.

But I also like to teach and organize.

What I can do for you?

As an economist, founder and manager, I worked in the field of:

- logistics (road transport),
- construction (highways, metal-plastic structures, external and internal repairs of buildings),
- education (lessons of mathematics, computer science, geography and astronomy, fashion show lessons, acting skills, design and tailoring, photo posing).

I produced ideas, organized processes, conducted active communication with partners, drew up contracts, statutory documents, developed tariff grids for salaries, calculated calculations, formed the price, forecasted the economic success of the company's possible actions. Therefore, I can do data analysis perfectly based on my extensive experience, including with Excel and Google tools. And also with new skills for working with SQL, R, Tableau, PowerBI, Python. Act quickly and accurately in critical situations.

As a web developer, I can create sites using HTML, CSS and frameworks, adapt them for different devices. Acquaintance with Figma. I study JavaScript hard. My university knowledge of algorithms, basics of Java helps a lot. I love if-else, I know operators, loops, arrays well. I work with API. I know Vanilla JavaScript better and I'm learning React.
